

Internal Audit System (IAS)

User Manual

Practical screen and workflow guide

Document version 1.0 | 27 August 2026

Prepared from the verified IAS source tree and authenticated local application views. No credentials, secrets or live record details are included.

Document Control

Document	Internal Audit System (IAS) User Manual
Version	1.0
Date	27 August 2026
Status	Issued for operational use and review
Basis	Verified Razor views, controllers/menu routes and authenticated local IAS screens

Revision History

Version	Date	Prepared for	Change
1.0	27 Aug 2026	IAS users / IT review	Initial verified user manual

How to use this manual

IAS menus and actions are permission-based. A screen may be absent, read-only or show different workflow actions for another user. Empty screenshots indicate that no test records were available; they still verify the screen layout and controls.

Contents

1. Getting Started
2. Home and Dashboard
3. Planning
4. Engagement
5. Execution
6. Auditee Portal
7. Post Compliance
8. I&ID
9. Reports
10. FAD
11. CAU
12. Sampling

14. Admin
15. Email
16. End-to-End User Workflows
17. Complete Verified Screen Catalog
18. Validation, Uploads, Search and Outputs
19. Figure Index and Verification Note

1. Getting Started

Sign in with the account assigned by your organization. After sign-in, use the permission-based left menu. Select parent filters first, review record status, then use only the action displayed for the intended row. Save preserves work; Submit, Approve, Reject, Authorize and Finalize are workflow decisions. Logout when work is complete.

Typical flow: Login - Home - select module - choose record - perform displayed action - verify status or output.

2. Home and Dashboard

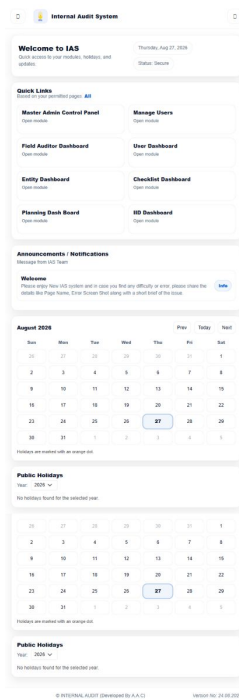

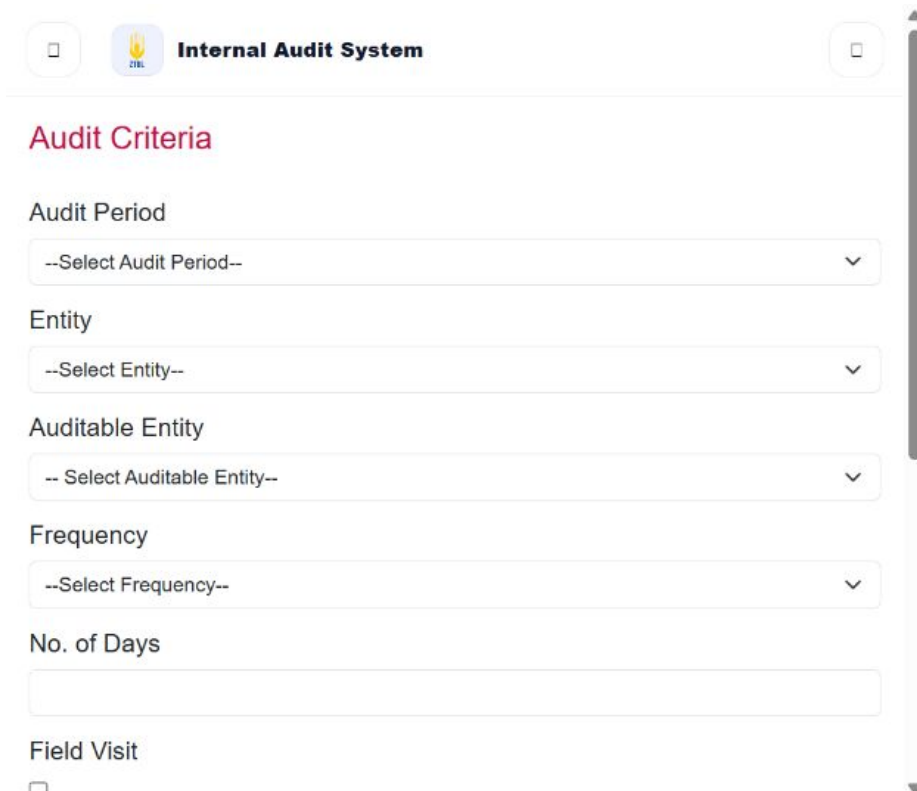

Figure 2.1: IAS Home and dashboard workspace

The home workspace provides quick links, announcements, calendars/holidays and dashboard entry points available to the signed-in user.

3. Planning

The screenshot shows the 'Internal Audit System' interface with a header bar containing a home icon, a logo, and the system name. Below the header, the 'Audit Criteria' section is displayed. It includes several form fields: 'Audit Period' (dropdown menu), 'Entity' (dropdown menu), 'Auditable Entity' (dropdown menu), 'Frequency' (dropdown menu), 'No. of Days' (text input), and 'Field Visit' (checkbox). A vertical scrollbar is visible on the right side of the form area.

Figure 3.1: Audit Criteria

Purpose: Define an audit period, entity, auditable entity, frequency, duration and field-visit requirement before submitting criteria.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Audit Period, Entity, Auditable Entity, Frequency, No. of Days, Field Visit, Save, Delete and Submit.

Procedure

1. Open Planning > Audit Criteria.
2. Select the audit period and entity.
3. Select the auditable entity and frequency.
4. Enter the number of days and set Field Visit when applicable.
5. Select Save and review the new row in the criteria table.
6. Use Delete only for an incorrect saved row; select Submit when the displayed criteria are ready for the next stage.

Expected result: IAS stores the criteria row and, on Submit, sends the displayed criteria into the configured planning review flow.

4. Engagement

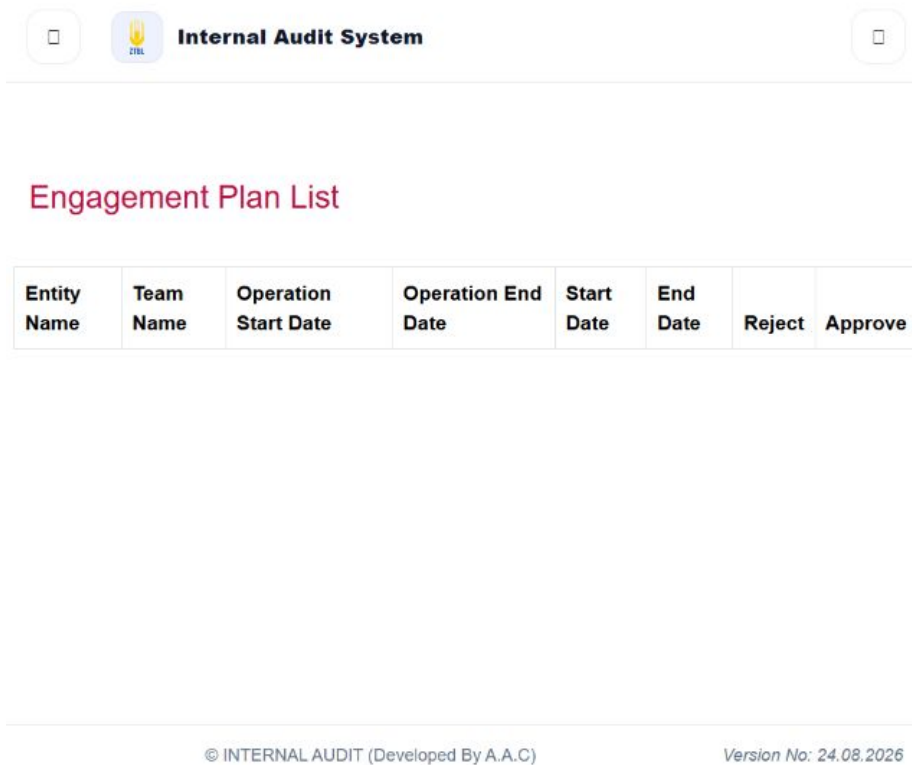

Figure 4.1: Engagement Plan List

Purpose: Review engagement dates and make the available approve or reject decision.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Entity Name, Team Name, operation/start/end dates, Reject and Approve.

Procedure

1. Open Engagement > Engagement Plan List.
2. Locate the engagement row and compare the entity, team and displayed dates.
3. Choose Approve or Reject from the row when that action is available to your profile.
4. Confirm the resulting status or removal from the work list.

Expected result: The selected engagement decision is recorded and the work list refreshes.

5. Execution

 **Internal Audit System**

Manage Audit Observations

Entity:

--Select Audit Entity-- 

Audit Period:

Memo No.	Title	Violation	Risk Category	Status	Action	Action
----------	-------	-----------	---------------	--------	--------	--------

© INTERNAL AUDIT (Developed By A.A.C)

Version No: 24.08.2026

Figure 5.1: Manage Observations

Purpose: Select an audit entity and period, then review and act on the resulting observation list.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Entity, Audit Period and a table containing Memo No., Title, Violation, Risk Category, Status and row actions.

Procedure

1. Open Execution > Manage Observations.
2. Select an Entity.
3. Select the Audit Period that becomes available.
4. Review the observation list and its status.
5. Use only the action shown on the relevant row to open or continue that observation.

Expected result: IAS opens the selected observation or refreshes the list after the completed action.

6. Auditee Portal

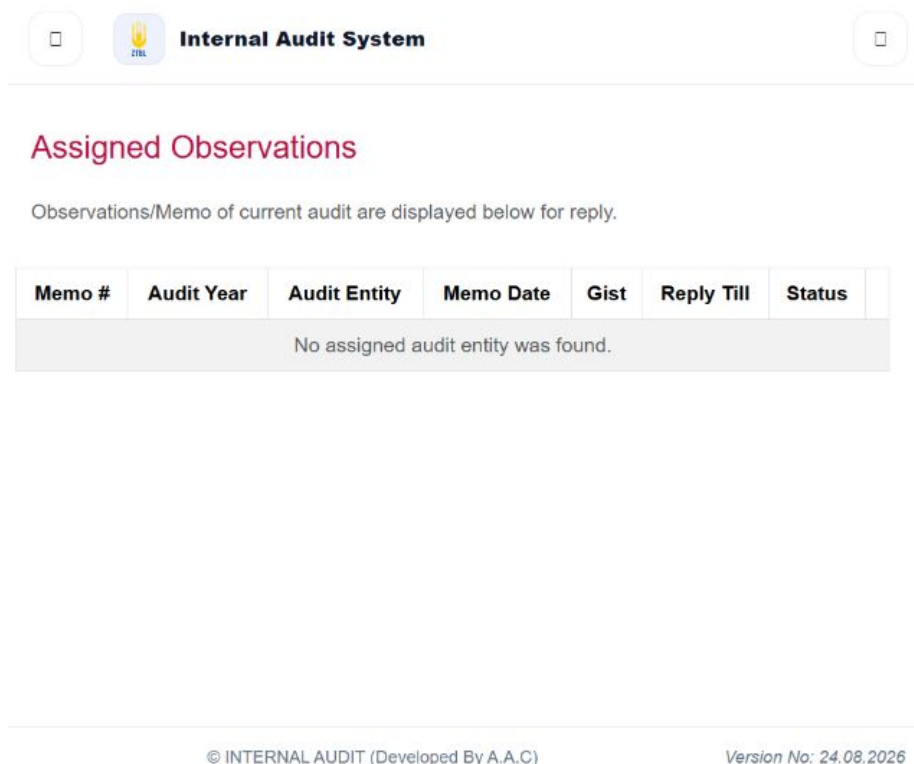

Figure 6.1: Observation Assigned

Purpose: Display observations or memos assigned to the signed-in auditee for reply.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Memo number, audit year, audit entity, memo date, gist, Reply Till and Status.

Procedure

1. Open Auditee Portal > Observation Assigned.
2. Locate the assigned memo and check the Reply Till date and current status.
3. Open the available row/action and enter the response and any permitted evidence.
4. Submit the response and confirm the updated status.

Expected result: The auditee response is attached to the assigned item and its workflow status is updated.

7. Post Compliance

Version No: 24.08.2026

Figure 7.1: Post Compliance

Purpose: Review outstanding compliance items and their compliance history.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Page size, Search, PDF, Export to Excel, Export to CSV, Copy to Clipboard and compliance-history table.

Procedure

1. Open Post Compliance > Post Compliance.
2. Use Search to narrow the displayed records.
3. Review the audit period, para, dates, title/gist, source and compliance history.
4. Use PDF, Excel, CSV or Copy only when an output is required.

Expected result: The list is filtered on screen or exported in the selected format.

8. I&ID

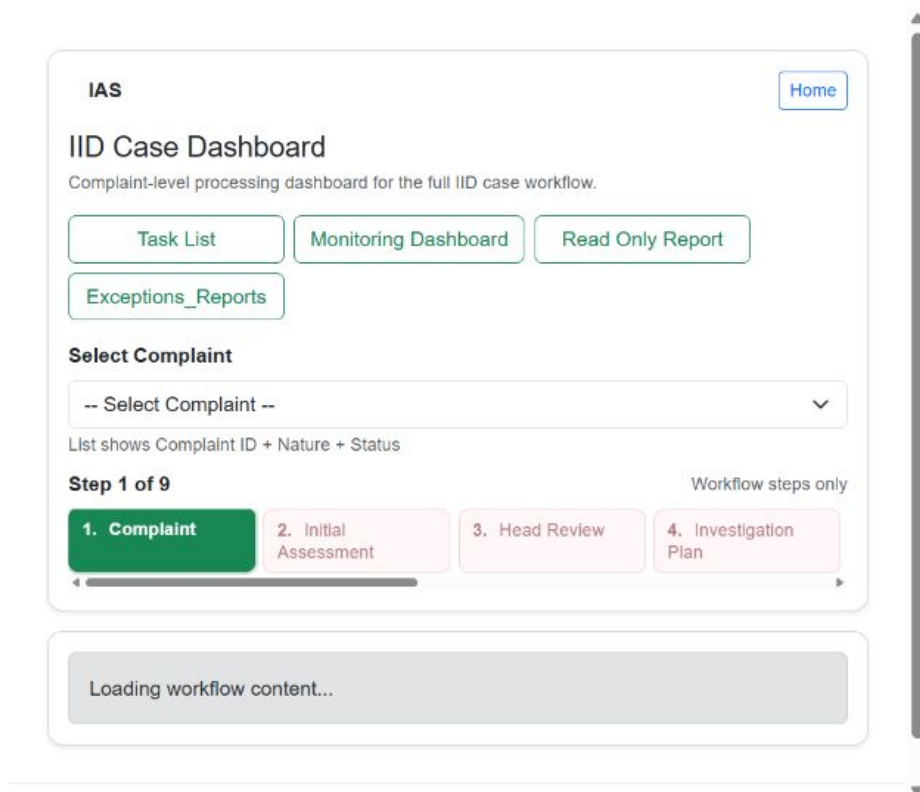

Figure 8.1: IID Case Dashboard

Purpose: Navigate the complaint/inquiry case workflow from complaint through final approval.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Task List, Monitoring Dashboard, Read Only Report, Exceptions Reports, complaint selector and numbered workflow stages.

Procedure

1. Open I&ID > IID Dashboard.
2. Select a complaint from the list.
3. Choose the active workflow stage, such as Complaint, Initial Assessment or Head Review.
4. Complete the fields and actions displayed inside that stage.
5. Return to Task List or Monitoring Dashboard to verify progress; use Read Only Report when a non-editable report is needed.

Expected result: The case remains at, or advances from, the selected workflow stage according to the action completed.

9. Reports

Internal Audit System

Settled Para Monitoring Report

Read-only report of settled para details and compliance history.

Entity

--Select Audit Entity--

Reporting/Controlling Office	Entity Name	Audit Year	Para No.	Settled By	Settled On	Risk	Compliance History
------------------------------	-------------	------------	----------	------------	------------	------	--------------------

© INTERNAL AUDIT (Developed By A.A.C)

Version No: 24.08.2026

Figure 9.1: Monitoring of Settlement of Para

Purpose: Read the settled-para details and compliance history for a selected entity.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Entity selector and report columns for office, entity, audit/para year, para number, settlement and compliance history.

Procedure

1. Open Reports > Monitoring of Settlement of Para.
2. Select an Entity.
3. Review the returned rows and settlement/compliance columns.
4. Use any export or print action only if it is displayed for the resulting report.

Expected result: IAS displays the settled-para monitoring data for the selected entity.

10. FAD

IAS : Work Flow of Field Auditors [Home](#)

Engagement -- No Engagements Available --

Engagement list and engagement state are loaded from the AR dashboard dropdown source.

Step 1 of 8 Click any step to navigate

Please select an engagement to begin the Field Audit workflow.

1. Joining 2. Sampling 3. Exception Report 4. Working Paper 5. C

Select an engagement from the dropdown above to load workflow content.

[Mark as Saved](#)

© INTERNAL AUDIT (Developed By A.A.C)

Version No: 24.08.2026

Figure 10.1: Field Auditor Dashboard

Purpose: Run the field-audit engagement workflow through the stages exposed for the selected engagement.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Engagement selector, Joining, Sampling, Exception Report, Working Paper and later workflow stages; Mark as Saved.

Procedure

1. Open FAD > Field Auditor Dashboard.
2. Select an engagement.
3. Choose the current enabled workflow step.
4. Complete the controls loaded in the workspace.
5. Use Mark as Saved when the stage content is complete enough to save, then continue to the next enabled stage.

Expected result: The selected engagement is saved at the current field-audit stage and later stages become available according to workflow state.

11. CAU

The screenshot shows the 'Internal Audit System' header with a mobile menu icon on the left and a user profile icon on the right. The main content area is titled 'Commercial Audit Workflow' with a 'STAGE OM' indicator. Below the title, it says 'Step 1 of 8 | Use the step strip to move between OM, PDP, and ARPSE.' A 'CURRENT OM Entry' button is shown next to a 'Home' button. A descriptive text reads: 'Create or update Office Memorandums without squeezing the form beside the register.' Below this is a horizontal step strip with eight steps: '01 OM Entry' (highlighted in green), '02 OM Register', '03 PDP Entry', '04 PDP Linking', '05 ARPSE Header', '06 ARPSE Linking', '07 ARPSE Monitoring', and '08 ARPSE Follow-up'. At the bottom, a grey box contains the text 'Loading workflow content...'.

Figure 11.1: CAU Workflow

Purpose: Manage the commercial-audit sequence from entity selection through ARPSE follow-up.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: CM Entity, CM Register, PO Entry, PDF Linking, ARPSE Header, ARPSE Linking, ARPSE Monitoring and ARPSE Follow-up.

Procedure

1. Open CAU > CAU Workflow.
2. Select the current commercial-audit entity.
3. Open the enabled workflow step.
4. Complete the controls shown in the workspace and save or submit using the action displayed there.
5. Continue to the next enabled step and use Monitoring or Follow-up for later-stage tracking.

Expected result: The commercial-audit item is saved at the selected stage and the workflow display refreshes.

12. Sampling

Internal Audit System

Monitoring of Samples

Entity:

--Select Entity Name--

Sr. No.	Sample List	Percentage	Total Count	Sample Count	View	Regenerate Sample
---------	-------------	------------	-------------	--------------	------	-------------------

© INTERNAL AUDIT (Developed By A.A.C)

Version No: 24.08.2026

Figure 12.1: Monitoring of Samples

Purpose: Monitor samples by entity and use the available view or regeneration action.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Entity, Sample List, Percentage, Total Count, Sample Count, View and Regenerate Sample.

Procedure

1. Open Sampling > Monitoring of Samples.
2. Select an Entity.
3. Review sample percentage and counts.
4. Choose View to inspect a sample or Regenerate Sample only when the displayed workflow permits it.

Expected result: IAS displays the selected sample details or refreshes the generated sample set.

13. Setup

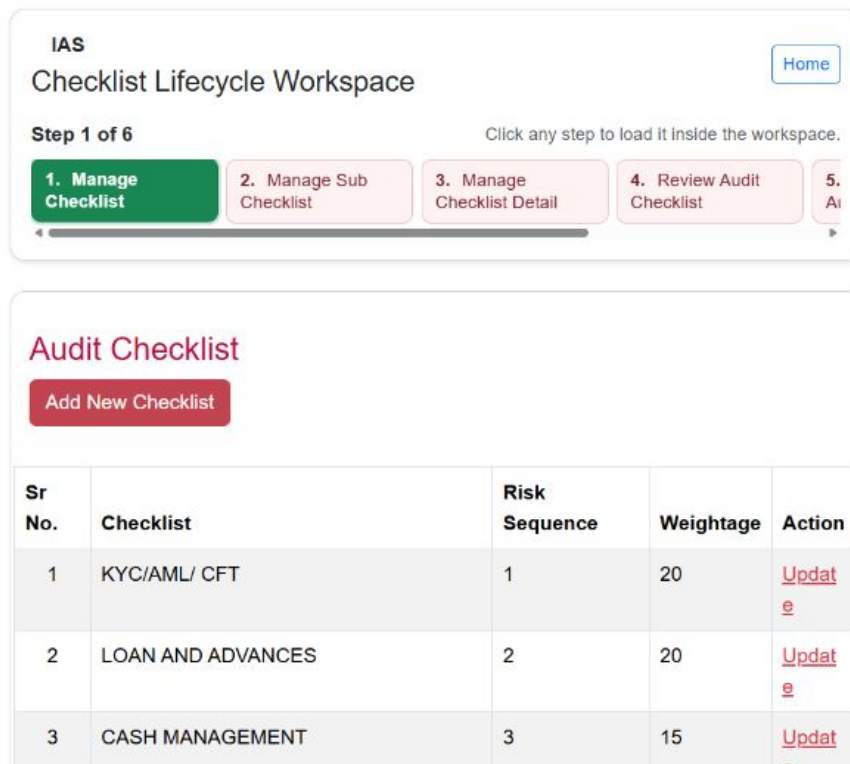

Figure 13.1: Checklist Dashboard

Purpose: Manage the checklist lifecycle through create, submit, detail, review and authorization stages.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

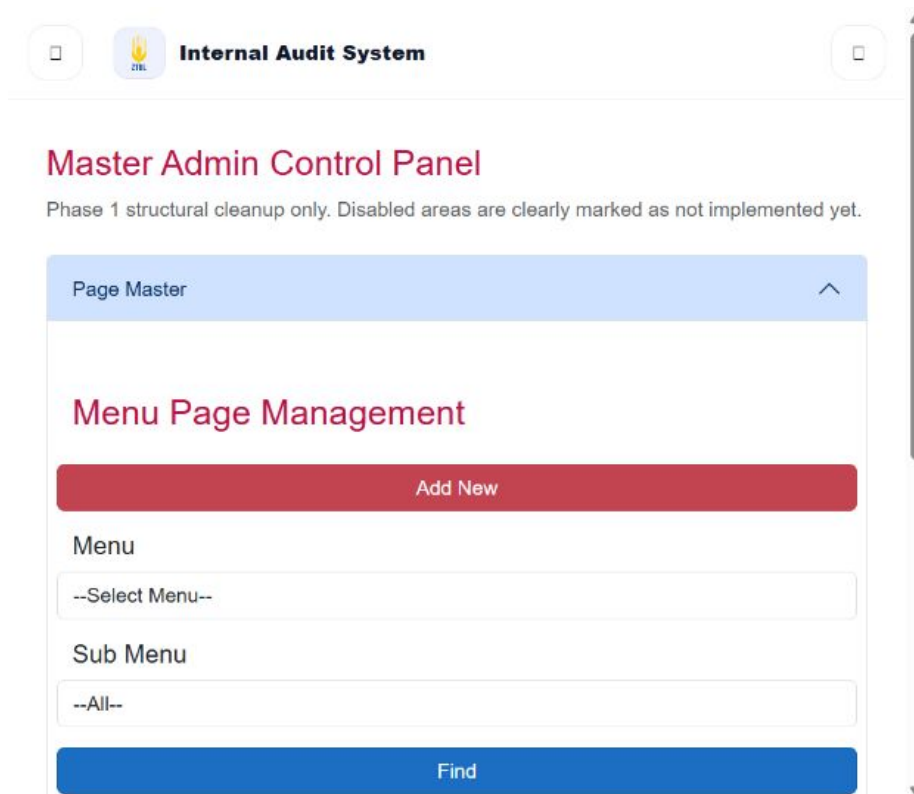

Main controls: Six-step lifecycle, Add New Checklist, checklist table and row Update action.

Procedure

1. Open Setup > Checklist Dashboard.
2. Choose the relevant lifecycle stage.
3. In Manage Checklist, select Add New Checklist or Update for an existing row.
4. Complete the stage-specific fields and save/submit using the displayed action.
5. Use the review or authorization stages only when they are enabled for your profile.

Expected result: The checklist is created or updated and its lifecycle state is reflected in the workspace.

14. Admin

Master Admin Control Panel

Phase 1 structural cleanup only. Disabled areas are clearly marked as not implemented yet.

Page Master

Menu Page Management

Add New

Menu

--Select Menu--

Sub Menu

--All--

Find

Figure 14.1: Master Admin Control Panel and Manage Users

Purpose: Maintain page/menu configuration and user records through permission-controlled administration screens.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Master panel phase/accordion controls; Manage Users fields for relationship type, office, posting, P.P. number, login name, email, group/role and active status.

Procedure

1. Open Admin > Master Admin Control Panel for menu/page configuration, or Admin > Manage Users for a user record.
2. Use Find or the available filters before changing an existing record.
3. Enter or update only the fields shown on the screen.
4. Select the displayed Add, Update, Save or assignment action and confirm the refreshed record.

Expected result: IAS stores the configuration or user change; visibility and available actions remain subject to assigned rights.

Internal Audit System

Figure 14.2: Manage Users

15. Email

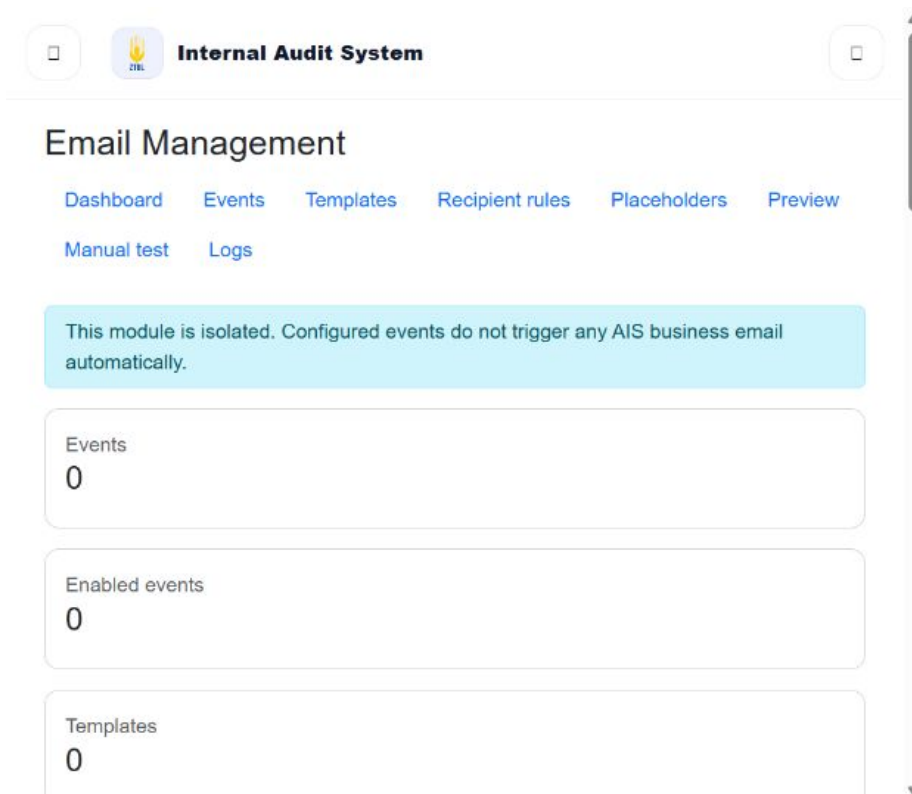

Figure 15.1: Email Management

Purpose: View and maintain the isolated email-management configuration area.

Access: Users whose IAS page/menu permissions expose this screen; available decisions depend on the signed-in profile.

Main controls: Dashboard, Events, Templates, Recipient rules, Placeholders, Preview, Manual test and Logs.

Procedure

1. Open Email > Dashboard.
2. Choose Events, Templates, Recipient rules or Placeholders to maintain configuration.
3. Use Preview before testing a message.
4. Use Manual test only with approved test recipients.
5. Review Logs for the recorded result.

Expected result: The selected email configuration or test result is saved and can be reviewed in Logs. The dashboard explicitly states that configured events do not automatically trigger IAS business email.

16. End-to-End User Workflows

Planning and engagement

Login -> Planning: constitute teams / enter audit criteria -> submit criteria -> reviewer approval or return -> generate/tentative plan -> Engagement Plan List -> approve or reject.

Observation and auditee response

Login -> Execution: select entity and audit period -> open observation -> complete available observation action -> Auditee Portal: open assigned observation -> reply and attach permitted evidence -> submit -> verify status.

Draft and final report

Login -> Execution: manage observations / draft report paras -> quality review -> finalize draft audit report -> concluding/closing audit. FAD also exposes report overview, finalize report and PDF lists for its workflow.

Post compliance and settlement

Login -> Post Compliance: find outstanding item -> enter or review compliance -> review stage -> monitoring of settled paras. Reports provides settled-para and compliance progress views.

IID inquiry

Login -> IID Dashboard -> select complaint -> Complaint -> Initial Assessment -> Head Review -> Investigation Plan -> Plan Approval -> Analysis / Inquiry Report -> Final Approval -> read-only report or case study.

Commercial audit

Login -> CAU Workflow -> select commercial entity -> CM Register -> PO Entry -> PDF Linking -> ARPSE Header/Linking -> Monitoring -> Follow-up.

Checklist lifecycle

Login -> Setup: Checklist Dashboard -> manage checklist -> submit -> manage detail -> review -> authorize. Update/authorization screens are also available as separate menu items.

Email configuration/test

Login -> Email Dashboard -> configure events/templates/recipient rules/placeholders -> Preview -> Manual test -> Logs. The verified dashboard states that events do not automatically trigger IAS business email.

17. Complete Verified Screen Catalog

Every function exposed in the authenticated IAS menu during the review is listed below. Access and actions are permission-based.

Dashboard

Screen / function	How to open	Verified user use
BAC Analysis FAD	Dashboard > BAC Analysis FAD	Filter and review the named IAS report or monitoring view.
Line Management	Dashboard > Line Management	Find, add or update the named configuration records using the controls displayed on the screen.

Planning

Screen / function	How to open	Verified user use
Constitute Teams	Planning > Constitute Teams	Prepare or maintain the named planning information and submit it through the displayed workflow.
Audit Criteria	Planning > Audit Criteria	Prepare or maintain the named planning information and submit it through the displayed workflow.
Referred Back Audit Criteria	Planning > Referred Back Audit Criteria	Prepare or maintain the named planning information and submit it through the displayed workflow.
Audit Criteria for Approval	Planning > Audit Criteria for Approval	Review the named item and use the decision actions displayed for the signed-in profile.
Approved Criteria / Generate Plan	Planning > Approved Criteria / Generate Plan	Prepare or maintain the named planning information and submit it through the displayed workflow.
Special Audit Plan	Planning > Special Audit Plan	Prepare or maintain the named planning information and submit it through the displayed workflow.
Special Audit Plan Approval	Planning > Special Audit Plan Approval	Review the named item and use the decision actions displayed for the signed-in profile.

Engagement

Screen / function	How to open	Verified user use
Planning Dash Board	Engagement > Planning Dash Board	Prepare or maintain the named planning information and submit it through the displayed workflow.
Engagement Plan List	Engagement > Engagement Plan List	Prepare or maintain the named planning information and submit it through the displayed workflow.
Tentative Audit Plan	Engagement > Tentative Audit Plan	Prepare or maintain the named planning information and submit it through the displayed workflow.
Manage SBP Password	Engagement > Manage SBP Password	Find, add or update the named configuration records using the controls displayed on the screen.
Sbp Observation Register	Engagement > Sbp Observation Register	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
Referred Back Engagement Plans	Engagement > Referred Back Engagement Plans	Prepare or maintain the named planning information and submit it through the displayed workflow.

Execution

Screen / function	How to open	Verified user use
Search / Find Check List	Execution > Search / Find Check List	Search for the named IAS records using the available filters.
Update Audit Paras	Execution > Update Audit Paras	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
Summary of Checklist	Execution > Summary of Checklist	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
Authorize Update Audit Paras	Execution > Authorize Update Audit Paras	Review the named item and use the decision actions displayed for the signed-in profile.
Create DSA	Execution > Create DSA	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
List Draft DSAs	Execution > List Draft DSAs	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
Authorize Delete Duplicate Para	Execution > Authorize Delete Duplicate Para	Review the named item and use the decision actions displayed for the signed-in profile.
Authorize Delete Duplicate Para	Execution > Authorize Delete Duplicate Para	Review the named item and use the decision actions displayed for the signed-in profile.
Quality Review of HO Paras	Execution > Quality Review of HO Paras	Review the named item and use the decision actions displayed for the signed-in profile.
Generate Observation PDF	Execution > Generate Observation PDF	Generate, open or download the named output when records are available.
Manage Observations	Execution > Manage Observations	Find, add or update the named configuration records using the controls displayed on the screen.
Manage Draft Report Paras	Execution > Manage Draft Report Paras	Filter and review the named IAS report or monitoring view.
Quality Review of Audit Paras	Execution > Quality Review of Audit Paras	Review the named item and use the decision actions displayed for the signed-in profile.
Finalize Draft Audit Report	Execution > Finalize Draft Audit Report	Filter and review the named IAS report or monitoring view.
Concluding Closing Audit	Execution > Concluding Closing Audit	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.

Auditee Portal

Screen / function	How to open	Verified user use
CCQs of Departments	Auditee Portal > CCQs of Departments	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
Observation Assigned	Auditee Portal > Observation Assigned	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.

Post Compliance

Screen / function	How to open	Verified user use
Post Compliance	Post Compliance > Post Compliance	Open the named work item, complete the displayed response fields and submit through the available workflow action.
Para Shifting	Post Compliance > Para Shifting	Find, add or update the named configuration records using the controls displayed on the screen.
Post Compliance For Review	Post Compliance > Post Compliance For Review	Review the named item and use the decision actions displayed for the signed-in profile.

Screen / function	How to open	Verified user use
Monitoring of Settled Paras	Post Compliance > Monitoring of Settled Paras	Filter and review the named IAS report or monitoring view.
CAU Paras Submission to Branch	Post Compliance > CAU Paras Submission to Branch	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.
CAU Paras Branch Reply	Post Compliance > CAU Paras Branch Reply	Open the named work item, complete the displayed response fields and submit through the available workflow action.
Review Settle New/AIS Paras	Post Compliance > Review Settle New/AIS Paras	Review the named item and use the decision actions displayed for the signed-in profile.
Review of CAU Paras Branch Reply	Post Compliance > Review of CAU Paras Branch Reply	Review the named item and use the decision actions displayed for the signed-in profile.

I&ID

Screen / function	How to open	Verified user use
IID Dashboard	I&ID > IID Dashboard	Open the module workspace and review the current work/status summary.
Monitoring Dashboard	I&ID > Monitoring Dashboard	Open the module workspace and review the current work/status summary.

Test	Email > Test	Open and work with the named IAS function using only the controls and actions displayed for the signed-in profile.

18. Validation, Uploads, Search and Outputs

Validation

Correct on-screen validation messages and verify the refreshed row, status or confirmation.

File/evidence handling

Associate files only with the intended record and follow the extension/size message displayed by that screen. Confirm retrieval from the same record.

Search/filtering

Select required parent values first, then search and review the resulting table.

Reports/downloads

Select the required scope, use the displayed output action, and verify the downloaded title and scope before distribution.

Errors and support

Record the screen name and time without confidential content, then contact IAS support if an error persists.
